Dynamic Web Development Report

What is the project?

This project about food that people can get it by online and easy for people to choose food from our restaurant in PhnomPenh.

Why we choose this project?

We choose this project or this topic because we see people hard to getting food and hard to find restaurant. Also, we see the opportunity that we can provide food around Phnompenh for people who needed. This platform will bring food to people.

What is our goal of making this happened?

Our goal this website provides users the best experience by getting food online and give them good information, especially, keeping the users on track of new food that we have. Also, we want to provides local food to local people that they hard to get food.

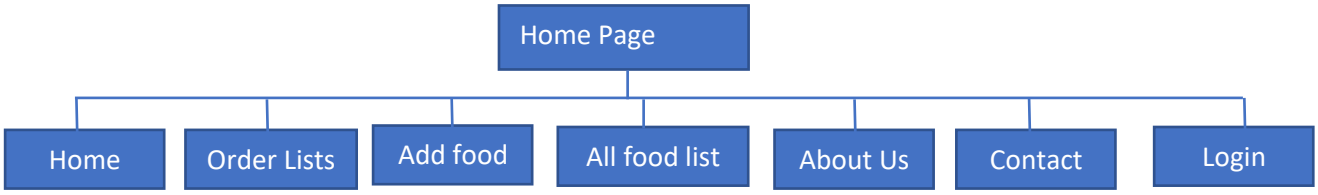
How my team build this platform?

Basically, we talk about this project what we want to see our platform look like? After discussions we got what we want.

First, we start with front-end which are HTML. Second, we started with our idea of website and similar website which have almost have content and beautiful layout so we can follow their style of their website. Third, we also got support from WE3school, stack overflow and especially plenty of method and tool from our instruction. Last but not least, we started dividing part for each member of our team.

For our back-end, we got our support from many resources such as YouTube and also our instructor. And we use PHP and MySQL as the back-end.

Here is our site map:



Arrange HTML overall structure + CSS style of home page + home page content + with login and register

TAKE AWAY & DELIVERY
Dear Friend
To avoid unnecessary travels, we do recommend you place large orders to keep at home. Most of the items below can be kept in a freezer or fridge for a few days already. This is a special “short menu” specially designed to help people during this sanitary crisis. If you want other dishes , please ask us.
Call this number to get your food : 099 888 999
